

CanSlip 2000 - Technical Data Sheet

A ready-to-use biodegradable asphalt release agent that does not require any dilution, making it easy and convenient to transport to all project sites. Effective at preventing pick-up on rubber tire rollers, as well as preventing build-up in truck boxes and on paving tools.

APPLICATIONS

- Rubber Tire Rollers
- Truck Boxes
- Truck Spray Stands
- Paving Tools
- Other Asphalt Vehicles
- All types of asphalt mixes, including polymers

HEALTH AND SAFETY

- No risk to personnel
- Not an inhalation or aspiration hazard
- Not carcinogenic

ENVIRONMENTAL IMPACT

- Rapidly biodegradable
- Not toxic to aquatic organisms or animals
- Not expected to bioaccumulate

AVAILABILITY

- Cube - 23L
- Barrel/Drum - 208L
- Tote - 1000L

TECHNICAL INFORMATION

GENERAL INFORMATION

Best Working Temp	5 to 50°C
Storage:	Store in appropriately labeled container, away from strong oxidizing agents. Good practice to store in a cool, well-ventilated area.
Fire Fighting Measures	Class K extinguisher for oil Alternative: ABC or Class B extinguisher

PHYSICAL & CHEMICAL PROPERTIES

Colour and State	Colourless, translucent liquid
Odour	Mild odour
Specific Gravity	~1 g/cm ³
Viscosity	~1.0 mm ² /sec
Flammability	Assumed to be combustible at very high temperatures
Flash Point	> 171 - 199°C
Auto-Ignition Temp	> 374 - 449°C
Conditions to Avoid	Sources of ignition

OTHER INFORMATION

GUIDANCE ON USE

- Thoroughly stir or agitate prior to each use.
- Spray truck beds sparingly - 1 L per truck.
- Tools and equipment can be sprayed or dipped.

COMPANION PRODUCTS

CanSlip SE - concentrated asphalt release agent for when a stronger agent is required

CanSlip LateSeason - ready-to-use asphalt release agent for cold weather and Hot Boxes

Summary only - refer to the SDS and Use and Care Documents for additional information and recommendations
