

A concentrated biodegradable asphalt release agent that provides flexibility. Effective with all asphalt mixes, including polymers. Prevents pick-up on rubber tire rollers, as well as build-up in truck boxes and on paving tools. Can also be used undiluted as a cleaner.

APPLICATIONS

- Rubber Tire Rollers
- Truck Boxes
- Truck Spray Stands
- Paving Tools
- Other Asphalt Vehicles
- Asphalt Cleaner
- All types of asphalt mixes, including polymers

HEALTH AND SAFETY

- No risk to personnel
- Not an inhalation or aspiration hazard
- Not carcinogenic

ENVIRONMENTAL IMPACT

- Rapidly biodegradable
- Not toxic to aquatic organisms or animals
- Not expected to bioaccumulate

AVAILABILITY

- Cube - 23L
- Barrel/Drum - 208L
- Tote - 1000L

TECHNICAL INFORMATION

GENERAL INFORMATION

Best Working Temp	5 to 50°C
Storage:	Store in appropriately labeled container, away from strong oxidizing agents. Good practice to store in a cool, well-ventilated area.
Fire Fighting Measures	Class K extinguisher for oil Alternative: ABC or Class B extinguisher

PHYSICAL & CHEMICAL PROPERTIES

Colour and State	Pale yellow, translucent liquid
Odour	Mild odour
Specific Gravity	0.88 g/cm ³
Viscosity	3.9 - 4.3 mm ² /sec
Flammability	Assumed to be combustible at very high temperatures
Flash Point	171 - 199°C
Auto-Ignition Temp	374 - 449°C
Conditions to Avoid	Sources of ignition

OTHER INFORMATION

GUIDANCE ON USE

- Mix 1 part CanSlip SE with 10 parts of water. Spray truck beds sparingly - 1 L of per truck.
- Tools and equipment can be sprayed or dipped.
- Use undiluted as a cleaner.

COMPANION PRODUCTS

CanSlip 2000 - ready-to-use asphalt release agent for when a water source is not available
